Skills

Backend Languages
C#, Java, SQL

Backend Frameworks & APIs
ASP.NET Core, REST APIs, Entity Framework

Databases:
SQL Server, SQLite, Relational Database Design, Data Normalization

Backend Concepts:
CRUD Operations, Authentication & Authorization, MVC, API Design

Testing:
Unit Testing (JUnit / XUnit / MSTest), Integration Testing, Test Case Design

Tools & Platforms:
Git, GitHub, Azure DevOps, Visual Studio, IntelliJ IDEA

Education

Diploma in Information Technology

Rosebank College
2022 – Present (Completed, graduation pending)

- Key Coursework & Focus Areas:
- Object-Oriented Programming and Software Design
 - Database Systems and SQL-Based Data Analysis
 - Systems Analysis and Application Design
 - Data Fundamentals and Structured Data Handling

Adrian Wiltshire

BACKEND DEVELOPER INTERN

PROFESSIONAL SUMMARY

- Backend Developer intern candidate with hands-on experience designing server-side logic, RESTful APIs, and relational databases.
- Skilled in C#, Java, SQL, and backend application architecture, with project experience in authentication, data persistence, and CRUD operations.
- Passionate about building reliable, secure, and scalable backend systems.

Projects

Disaster Relief App

Software Developer | C#, ASP.NET Core, SQL – GitHub: [DisasterReliefApp](#)

- Developed a database-driven web application using ASP.NET Core and SQL Server
- Implemented user authentication, role-based access, and CRUD operations
- Designed relational data models to ensure data integrity and scalability

EasyKanban Task Management Web App

Java, Swing – GitHub: [EasyKanban](#)

- Created a task management application using Java and object-oriented principles
- Implemented task creation, editing, and status management
- Applied OOP principles to manage business logic cleanly

Retail Sales Analytics Project

SQL, Python (basic) – GitHub: [RetailSalesAnalytics](#)

- Analyzed retail sales data using SQL queries and aggregation techniques
- Identified trends through filtering, grouping, and data comparison
- Interpreted insights to support business decision-making scenarios

Donation Analytics Dashboard Project

C#, WPF, SQL, Data Visualization – GitHub: [DonationAnalyticsDashboard](#)

- Designed dashboards to visualize and analyze structured SQL data
